At Olin

Olin College of Engineering, located in the greater Boston area in Needham, MA, seeks enthusiastic applicants for faculty positions at all ranks in computer science, software engineering, computational science and engineering, or related areas. Olin is committed to an inclusive and diverse environment, and we strongly encourage individuals from historically underrepresented communities and women to apply.

Computing

Olin College is a highly selective, gender-balanced undergraduate engineering college, which was founded in 1998 with goals to develop students as exemplary engineers, to drive positive change in engineering education, and to do good throughout the world.   Towards these goals, we have developed an innovative approach to engineering that erases boundaries between disciplines, encourages students to take control of their learning, and emphasizes human-centered design and entrepreneurship. We have forged active partnerships with neighboring Babson and Wellesley Colleges and have co-developed transformative educational experiences with collaborators around the globe. We are thrilled to grow our faculty team as we continue to innovate within and outside of Olin.

is Everywhere

Computing plays a vital role at Olin. From the first semester course on modeling and simulation to the year-long industry-sponsored senior capstone project, from our active research communities in areas such as robotics and assistive technologies to our deployed innovations in the developing world, our students learn the tools and practices of computing and apply them to real world problems.

We seek applicants who bring expertise in computer science, software engineering, computational science and engineering, or related disciplines. We are particularly excited about individuals who can articulate a vision for innovating in our computing-focused course offerings, for strengthening connections between computing and other parts of the Olin curriculum, and for involving students in their externally-facing professional work (e.g., research, entrepreneurship, consulting).

If you are passionate about integrating computing throughout the curriculum and beyond, we would love to hear from you. We encourage applicants to apply by December 5, 2016, and applications will be considered as they are received.
