Dream

Envisioning positive change in the world requires big thinking and broad collaboration. Like our students, we are dreamers. There are no departments at Olin; you will work with students, staff and the entire faculty to integrate business and entrepreneurship into exemplary engineering education. Beyond our campus, we collaborate with others around the world to imagine and drive change in engineering education.

and Deliver

We believe that an engineering education should empower students to both imagine AND realize positive change in the world. To do this they need an engineering education that integrates business literacy and entrepreneurial ability. Are you passionate about enabling students to turn their plans and designs into actions and ventures to revolutionize urban sanitation, create the world’s largest makerspace, or be agents of change within existing companies both big and small? We are. Collaborate with us to help students transform ideas into impact.

at Olin

We know that engineering begins and ends with people. So does engineering education. We are excited about co-teaching in an experiential, interdisciplinary, student-centric learning environment. We enjoy fun, irreverent, creative acts and stretch ourselves to work and teach outside of our comfort zones. We are seeking enthusiastic applicants for a full- or half-time faculty position in entrepreneurship. Whether you are an academic or an active practitioner, if you hold a relevant advanced degree or have years of experience developing ventures and those who venture, we would love to hear from you.
