

**Olin College**  
of Engineering

*faculty search*

## At Olin

Olin College of Engineering, located in the greater Boston area in Needham, MA, seeks applications from enthusiastic faculty candidates at all ranks who are passionate about having an impact in the world and educating the next generation of engineering innovators. Olin is committed to an inclusive and diverse environment, and we strongly encourage individuals from historically underrepresented communities and women to apply. Applications for all ranks will be considered, and start dates are in Fall 2017.

## We're **solving hard problems**

Olin College is a highly selective, gender-balanced undergraduate engineering college, which was founded in 1998 with goals to develop students as exemplary engineers, to drive positive change in engineering education, and to do good throughout the world. Towards these goals, we have developed an innovative approach to engineering that erases boundaries between disciplines, encourages students to take control of their learning, and emphasizes human-centered design and entrepreneurship. We have forged active partnerships with neighboring Babson and Wellesley Colleges and have co-developed transformative educational experiences with collaborators around the globe. We are thrilled to grow our faculty team as we continue to innovate within and outside of Olin.

## Across disciplinary boundaries

Realizing positive change in the world requires thinking big and taking risks. Our faculty are fueled by the belief that the future of engineering lies in transcending disciplinary boundaries. We are excited about all aspects of engineering, from understanding people and their needs, to the mathematics and science underlying new technologies, to delivering innovative services and products that improve the world. We enjoy co-teaching in an experimental, experiential, student-centric learning environment, and we thrive on involving students in our research, consulting, and other forms of professional work.

If you enjoy imagining ways students might better integrate engineering, computing, science, mathematics, business, humanities, and social sciences, as they study complex technical systems and societal issues, we'd love to hear from you. We encourage applicants to apply by December 5, 2016, and applications will be considered as they are received. For more information on the application process, please see [www.olin.edu/search](http://www.olin.edu/search).

Olin College is an Equal Opportunity Employer. We specifically invite applicants who can contribute to a diverse, inclusive community.
