Energetic, hardly tires-
Seen with pencil, or else pliers.
Likes computers; fond of rhymes.
Climbs trees; sleeps... sometimes.
For the first time since middle school, I've had the same address for over a year – by Purdue University in rural Indiana, where the "hot local attraction" is a dairy farm... so I often break from my PhD studies in Engr Edu to do things like take my new hearing aids (microwaves beep! water makes sounds!) traipsing 191 miles from coast-to-coast in England, learning IPA to speak languages I can't hear (currently: German), joining a modern dance company, and submitting research proposals to the NSF in comic strip format. Chronicling at blog.melchua.com.
Raised in the south, I enjoy experiencing new places. I take risks & accept challenges even when it's more prudent to do otherwise.
