

SCOPE:

Senior Capstone Program in Engineering

Sponsor a SCOPE team:
Exceptional value for our partners;
invaluable experiences for our students

About SCOPE

SCOPE is a unique industry-college collaboration, and the culminating experience of an Olin student's education. Over the course of a full academic year, seniors work in multi-disciplinary teams to provide innovative solutions to a company's real-world problem. Olin has conducted SCOPE projects for organizations around the country, including Fortune 500 corporations, government research laboratories, product development companies, small businesses and startups. If you have a challenge which, if addressed, could significantly benefit your company—and you would like to have a team of innovative, entrepreneurial engineers focus on it for an academic year—your company may be a good fit for SCOPE.

Why SCOPE?

In the SCOPE program, seniors are grouped in teams with appropriate skill sets to match the needs of each sponsor company's project. Partners benefit from:

- Innovative and unexpected solutions to real-world, real-time problems from a talented team of creative young engineers
- Student teams' access to technical expertise of faculty and industry advisors
- Strong program structure to support the teams' work, including project management training, reporting and feedback loops, access to Olin's state-of-the-art facilities and a dedicated, professionally equipped work space
- An appropriate non-disclosure agreement to protect sensitive interests
- Sponsor retention of all intellectual property developed by team
- Preferred recruitment opportunities

Be in Good Company: 2018-19 SCOPE Partners

- Aerodyne*/Air, Inc.: Empowering At-Risk Communities by Democratizing Air Quality Data
- Amazon Robotics*: Amazon Robotics: Container Storage System
- Bill & Melinda Gates Foundation: Pit to Roadside Fecal Sludge Conveyance
- Boeing*: Improving the Wire Harness Assembly Process
- Boston Scientific*: Designing Next-Generation Disposable Endoscopes
- Dassault Systemes SolidWorks*: Digital Construction
- Ford Motor Company: Guiding Principles for Customer Profiles
- GE Healthcare*: Power Quality and Environmental Monitor
- Iron Mountain: Automation of Document Preparation for High-Speed Scanning
- Microsoft Corporation: Making Smart Cities Inclusive
- Santos Family Foundation*/DDOT/Volpe Center*: LISA: Level of Intersection Stress Analysis
- Toyota Motor NA: Exploring New Directions in Personal Mobility
- Watts Water Technologies: Plumbing Sensor Network for Legionella Risk Factor Control

*Multiple-Year Sponsor

➔ Natalie MacMillan

Sr. Product Manager, Marketing
Insulet

"Our student team exuded hard work and passion which was evident in the output of the Toby app project this year. The team never ceased to impress me throughout the year; Professional, articulate, poised, passionate, and thoughtful. I truly felt like they were an extension of the team and thoroughly enjoyed working on this project with them. I'm looking forward to commercializing most, if not all, of what they did!"

➔ Kurt Geitz

Vice President, R & D
Boston Scientific

"The SCOPE teams often come up with novel ideas to enable opportunities for our new products. They've actually shaped us in more ways than just a single product idea. We've picked up some of the structure that Olin teaches in the way we analyze opportunity and winnow down to the concept selection. On the test method side, we've learned some surprising things about how devices interact with the biology that we had not thought of before. They always come back with insights that surprise us. We've hired students and graduates, and they infect the teams that they work on. They bring not just the tools, but an unusual way of thinking about things. They challenge their peers, and they bring up the level of performance of everyone on the team."

➔ Tim Stallman

Software Development Manager
Amazon Robotics

"Amazon is a Think Big and think long term company. We recognize Olin as a top engineering educational institution with excellent engineering talent and value set that aligns with Amazon's core leadership principles. The partnership has already exceeded our expectations and we anticipate many more years of collaborations."
